- Alabama Fire Sprinkler Association
- Allsouth Sprinkler
- Atlanta Sprinkler
- Georgia Firefighters Burn Foundation
- Georgia Fire Inspectors Association
- SPP Pumps

State Insurance Commissioner Ralph T. Hudgens' office promotes an art contest for elementary grades based on a national fire safety topic. The art which best fits the overall topic combined with a monthly fire safety theme is incorporated into a 'Fire Safety Tips' calendar which is distributed to every third grade classroom in the state.

GOLF Tournament

Through our association with The Georgia Fire Fighters Burn Foundation, funds raised will be used to support The Burn Foundation and to produce an educational calendar to raise the awareness of Georgia children in fire prevention and fire protection. Our goal is simple: To provide you with a day of golfing and fellowship while raising money for these worthy causes. Thank you in advance for your participation, sponsorships, and generosity.

Founded in 1982 by a group of DeKalb area firefighters, the **Georgia Firefighters Burn Foundation's** goal is to help burn survivors in their journey of recovery as well as to prevent others from experiencing the traumatic event of a burn injury.

The foundation serves all Georgia in its three fold mission:

- o To educate the public in burn awareness and prevention.
- o To support medical facilities in the care of burns in Georgia.
- o To assist burn survivors in their recovery.

In order to succeed in this mission, it relies on the support of our dedicated volunteers and their generous contributions of time, talent, and resources.

The Georgia Fire Sprinkler Association was formed in 1983 by merging the local chapters of the National Fire Sprinkler Association and the American Fire Sprinkler Association. This Association is a non-profit organization whose main objectives are to:

PROMOTE:

Develop an on-going relationship with the state and local fire officials, building officials, authorities having jurisdiction, architects, and engineers. Promote the automatic fire sprinkler industry and develop new materials.

EDUCATE:

Promote educational projects for fire and building officials, architects, engineers, contractor members, and the general public. Perpetuate the quality of automatic sprinkler systems by keeping abreast of innovations, changes, and new techniques.

LEGISLATE:

Participate in the establishment of local and state codes regarding the fire sprinkler industry. Promote legislation of fire protection bills.
